<b>Engagement of Child/Family</b>	<p><u>Arizona</u></p> <p><i>Engagement of the child and family</i> is defined as the active development of establishing trust in the helping relationship based on personal attributes...The Child and Family Team (CFT) process is a partnership, and engagement is the beginning of that partnership. Examples of covered services that this activity may be billed under include:</p> <ul style="list-style-type: none"> <li>▪ <i>Case management</i> which is a supportive service provided to enhance treatment goals and effectiveness and activities related to engaging the child/family such as brief telephone or face-to-face interactions with a person, family or other involved party for the purpose of maintaining or enhancing a person's functioning and participation in staffings, case conferences or other meetings with or without the person or his/her family participating.</li> <li>▪ <i>Home care training family (family support)</i> which involves face-to-face interaction with family member(s) directed toward restoration, enhancement or maintenance of the family functioning to increase the family's ability to effectively interact and care for the person in the home and community.</li> </ul> <p><u>Florida</u></p> <p><i>Therapeutic behavioral on-site services</i> are designed to assist children who have complex needs and their families in an effort to prevent the need for more intensive, restrictive behavioral health placement. The process must be driven by assessment of the individual needs and strengths of each child and family and be developed and directed by a treatment team. The treatment team must include the child and family, informal support to the family system and the professionals</p>	<p>Arizona Division of Behavioral Health Services Covered Services Guide – July 2007 pp 78 and 87</p> <p>Arizona Division of Behavioral Health Services Technical Assistance Document 3 – The Child and Family Team Process – Rev January 10, 2006 p 3 and Attachment 1</p> <p>Florida Community BH services Coverage and Limitations Handbook for Medicaid: pp 2-1-34, 2-1-35 and 2-1-37</p>

	<p><u>Rhode Island</u></p> <p>In the Children's Intensive Services (CIS) standards, engagement of the child and family is stressed throughout. Examples include:</p> <ul style="list-style-type: none"> <li>▪ A critical objective of CIS is for parents to be able to safely and satisfactorily address their child's behaviors and functioning while living at home. Children and parents are to actively work with the provider in the shaping, development and implementation of the Service Plan. This child/family/provider working partnership must be clearly evident in all Treatment Plan documentation. (see section 4.8)</li> <li>▪ CIS provider-agencies must incorporate key components of family-centered care into their philosophy, service program, operations and education. One resource to refer to is "Family - Centered Practice: How are we doing?" There are many more resources available for review by potential providers. Applicants must demonstrate the manner in which important principles of family-centered care are part of their approach to services. The provider must ensure the greatest degree of family participation in the full range of CIS activity. (see section 5.3)</li> </ul> <p>The CEDARR program is family focused; seeking to incorporate the key elements of family centered community based care into practice.</p> <p>The PASS program is a consumer-directed approach that assumes the family wants to and is able to take on the primary responsibility of identifying and prioritizing service goals and objects. Uses a family – professional team with family describing what should be done and PASS staff describing how it should be done.</p>	<p>Rhode Island – Standards for Providers of Children's Intensive Services: September 1, 2003 pp 24-27</p> <p>Rhode Island – Certification Standards for CEDARR Family Centers: May 25, 2000 pp 1-4</p> <p>Rhode Island – Certification Standards Personal Assistance Services and Supports: September 27, 2004 pp 6-7</p>

<b>Immediate Crisis Stabilization</b>	<p><u>Georgia</u></p> <p><i>Crisis intervention</i> is a covered service that is directed toward the support of a child who is experiencing an abrupt and substantial change in behavior which is usually associated with a precipitating situation and which is in the direction of severe impairment of functioning or a marked increase in personal distress. It is designed to prevent out of home placement or hospitalization. Examples given of interventions that may be used to de-escalate a crisis situation include: a situational assessment; active listening and empathic responses to help relieve emotional distress; effective verbal and behavioral responses to warning signs of crisis related behavior; assistance to, and involvement/participation of the individual (to the extent he or she is capable) in active problem solving planning and interventions; and facilitation of access to a myriad of crisis stabilization and other services deemed necessary to effectively manage the crisis.</p> <p>Crisis assessment and intervention is also covered as a component of other covered services such as <i>community support – team, crisis stabilization program services and intensive family intervention</i>.</p> <p><u>Hawaii</u></p> <p>Four types of emergency behavioral health services are covered (i.e., crisis stabilization)</p> <ul style="list-style-type: none"> <li>▪ <i>24-hour crisis telephone stabilization</i> which via telephone provides initial assessment, support, consultation and referral to dissipate the crisis situation.</li> <li>▪ <i>Crisis mobile outreach</i> which include services such as crisis intervention and counseling, intensive in-home services to stabilize family. The immediate response involves conducting an assessment of risk, mental status, and medical stability and immediate crisis resolution/stabilization and de-</li> </ul>	<p>Georgia Provider Manual Part I, Section 1 for Mental Health and Addictive Services July 2006 - Core Benefit Package pp 8-10, 53-58, 64-67 and 68-72</p> <p>Hawaii – Interagency Performance Standards and Practice Guidelines – Purple Book pp 47-65; 153, 159 and 182</p>

	<p><u>Hawaii</u></p> <p>Each service plan includes a proactive crisis plan reflective of strategies to avert potential crises, ensure safety using specific and appropriate strategies already known to staff for implementation to manage situations without placement disruptions. In the event a student/youth's behavior is deemed to be a risk to self or others, the school or contracted agency's clinical professional staff must be involved in assessment and determination of appropriate courses of actions. Crisis plans that include natural consequences (e.g., police involvement) should define the positive behavioral supports that should be implemented and exhausted prior to police involvement.</p> <p>Crisis planning is part of the mental health treatment plan developed by the service provider and must be tailored to the individual's known or potential high-risk situations that specifically address setting events, triggers, preventive as well as reactive interventions is an expected component of the MHTP that build off the crisis component in the CSP. The crisis plan components will address problematic behaviors utilizing the known strengths and preferences of the youth to reduce or eliminate the high-risk situations and assure youth's safety.</p> <p>Providers of <i>crisis therapeutic foster home</i> and <i>community-based crisis group home</i> are required to develop a crisis plan if one does not exist for the child. <i>Individual therapy, functional family therapy</i> and <i>treatment service planning participation</i> include crisis planning as a component of the service.</p> <p><u>Kentucky</u></p> <p>Requires the Impact Plus care plan to include a crisis action plan that progresses through a continuum of care that begins with the use of natural supports and</p>	<p>Hawaii – Interagency Performance Standards and Practice Guidelines – Purple Book pp 8, 11, 251, and 274</p> <p>Kentucky 907 KAR 3:030. 	safety risks and issues in provision of direct services, documentation of child-specific training to minimize and manage untoward events, general safety procedures, incidence reporting and direct services back up plan.	Supports: September 27, 2004 pp37
<b>Strengths/Needs Assessment</b>	<p><u>Arizona</u></p> <p><i>Assessment, evaluation and screening services</i> are covered services that involve the gathering and assessment of historical and current information which includes face-to-face contact with the person and/or the person's family or other informants, or group of persons resulting in a written summary report and recommendations. Arizona uses a standardized assessment that includes gathering information from the person and family/significant others regarding their special needs, strengths and preferences. As part of the clinical formulation/case summary, the assessor is required to identify strengths and needs of the person and his/family and to summarize on the service plan the person/family strengths that have been identified through the assessment process and to draw upon these strengths in developing the interventions to meet the person's specific service plan objectives.</p> <p><u>Florida</u></p> <p><i>Therapeutic behavioral on-site services</i> are designed to assist children who have complex needs and their families in an effort to prevent the need for more intensive, restrictive behavioral health placement. The process must be driven by assessment of the individual needs and strengths of each child and family and be developed and directed by a treatment team.</p> <ul style="list-style-type: none"> <li>▪ <i>Therapeutic behavioral on-site therapy services</i> include...strength-based clinical assessment of the mental health, substance abuse or behavioral</li> </ul>	<p>Arizona Division of Behavioral Health Services Covered Services Guide – July 2007 – p 34</p> <p>Arizona Instruction Guide for the Assessment, Service Plan and Annual Update – 1/1/2006 – pp 1, 31-32, 64</p> <p>Florida Community BH services Coverage and Limitations Handbook for Medicaid pp 2-1-34 and 2-1-37</p>
